

1. Facilitate the payment process for government and private agencies.
2. Activate the foundations of decent work in terms of payment and wages confirmation, and it will have other advantages in the future.
3. Transfers can be carried out without cash, so the workers do not have to open bank accounts or own any other bank card.
4. It is safer than keeping the sums in cash.

The E-wallet is created as follows:

1. Choose the mobile payment service provider with whom you want to open an E-wallet.
2. Fill out all the required information on the form.
3. Photocopy your passport and upload it in your application.

E-Wallet

A safe move to ensure decent work for domestic workers in Jordan.

Are you a migrant domestic worker?
Are you working in Jordan?
Do you want your financial transactions to be safe?

Try the E-wallet:

It is an electronic application that organizes all financial movements

It is safe because it contains all the data of the card user in an encrypted form. E-wallet can be installed on your personal computer or mobile or any other electronic device. Through this application, all data can be saved and used for payment online.

How can you benefit from it?

It facilitates your financial transactions such as:

1. Receiving your monthly salary
2. Purchasing your needs
3. Paying your bills
4. Performing small or large cash transfers quickly.

Is it Safe?

Yes, many major companies and banks use electronic wallets technology online through devices supported by many secure programs and Layer Secure Socket Protocol

How to Use E-Wallet

1. Via Personal Computers

Many companies have created programs and applications called "E-wallet software applications" E-wallet software applications are considered safe. However, when you install these applications on the computer, many advertisements windows begin to appear, and some of these advertisements are considered unsafe (spying scams and other things that annoy the user).

2. Via Mobile:

E-wallet is widely used all over the world through mobile devices. Like computers, these applications can be installed on mobile phones. In this case, the user must not use any application that does not contain a safety certificate. Applications without safety certificates are vulnerable to leakage or theft. What are the benefits of using E-wallet by female domestic workers:
